The Alabama Forestry Commission is an equal opportunity employer and provider. In accordance with federal law and Alabama Forestry Commission policy, this agency does not discriminate on the basis of race, color, national origin, sex, age, or disability.

FOREST RESOURCE REPORT 2007

By
Alabama Forestry Commission

This report contains several economic status indicators of the forest industry and natural resources in Alabama for 2007. Included in this report are the following indicators:

- 2007 Timber Harvests Volume
- 2007 Timber Price Trends
- 2006 Timber and other Agricultural Commodities Rankings (*latest statistics available*)
- 2002 Labor, Payroll, and Number of Forestry-related Establishments (*latest statistics available*)
- 2007 Forest Products Investments in New & Expanding Businesses
- 2006 Commercial Forestland Acres and Ownership (*latest FIA statistics available*)
- 2006 Forest Timber Inventory Statistics (*latest FIA statistics available*)

2007 Timber Harvests Volume

- In 2007, 1.73 billion board feet of pine sawtimber and 359 million board feet of hardwood sawtimber were harvested. Sawtimber harvests accounted for approximately 33% of the total harvests in 2007.
- Approximately 6.2 million cords of pine pulpwood were harvested in 2007 while 3.6 million cords of hardwood pulpwood was harvested. Pulpwood accounted for 66% of the total volume harvested.
- Harvest volumes increased 8% over the previous five year period's average volume.

2007 Timber Price Trends

- Alabama's average stumpage prices for 2007 increased in the "oak sawtimber" and "pine pulpwood" product categories while stumpage prices decreased in all other product categories according to Timber Mart South reports.
- The total estimated value of stumpage harvested in 2007 was approximately \$791 million.

Table 4. Stumpage Revenue from Sale of Forest Products by Product and County for Calendar Year 2007.

2002 Labor, Payroll, and Number of Forestry-related Establishments

- In 2002, (*latest statistics available*) forestry manufacturing amounted to approximately 18.5% of the total manufactures in Alabama, and directly employed 47,692 people (not counting private consultants and government employees) with a payroll of over \$1.6 billion at 948 establishments. An additional 6,000 people are employed in the forestry and logging sector.

2006 Commercial Forestland Acres and Ownership

- Alabama forestland covers 22.6 million acres, the second largest commercial forestland in the nation. Approximately 94% of these forests are privately owned (6% are owned by the public, primarily the National Forests). Forest industry owns 15% of the forestland, but is quickly divesting of most of this property.
- Alabama forests are comprised of 44% hardwood stands, 41% pine stands, and 15% mixed pine/hardwood stands. 44% of forest stands consist of primarily sawtimber-sized timber while an additional 27% of forest stands are comprised of mostly pulpwood-sized timber.

2006 Forest Timber Inventory Statistics

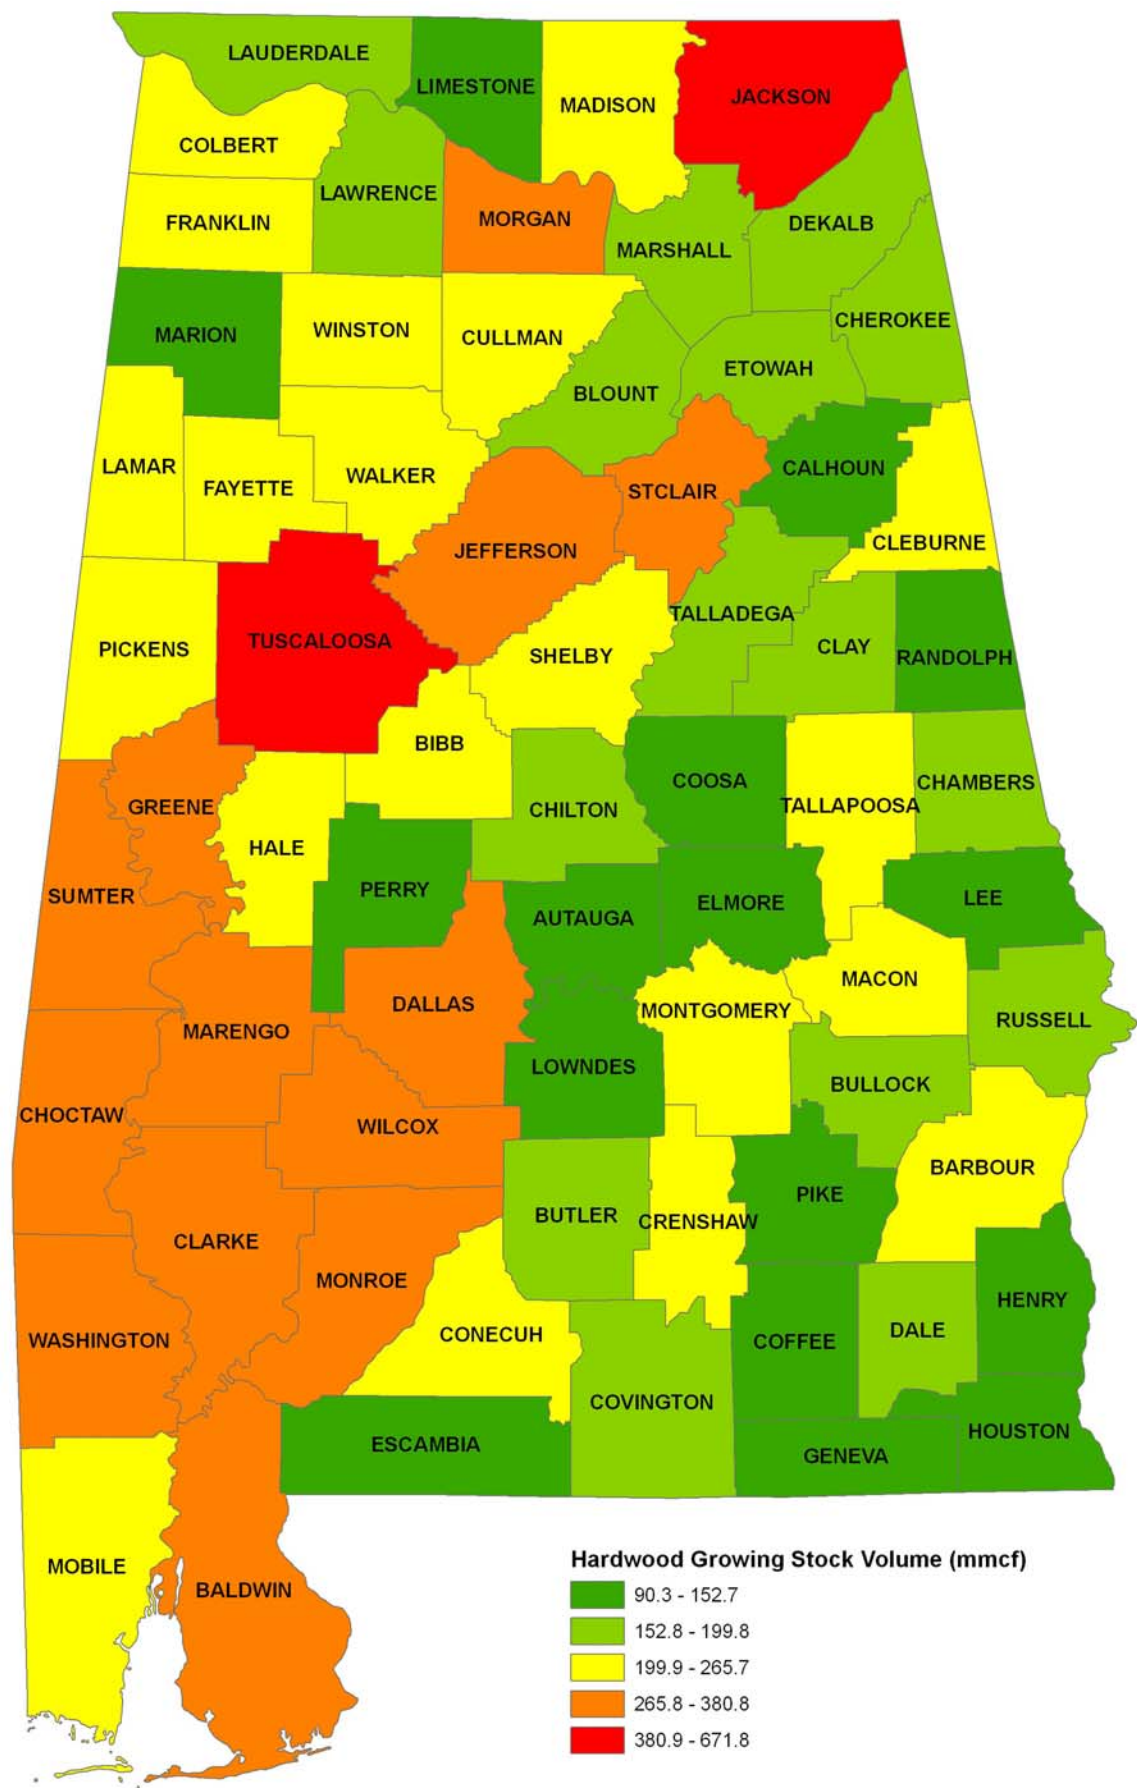

- According to 2006 FIA data, there is 13.6 billion cubic feet of softwood growing stock and 14.8 billion cubic feet of hardwood growing stock in Alabama. For the time period of 2001 to 2006, softwood net growth was 1 billion cubic feet annually and net growth for hardwoods was 532 million cubic feet annually. Softwood volume removed as a result of harvesting during this same period amounted to 822.5 million cubic feet (6.0% of the total softwood inventory) and hardwood volume removed was 375 million cubic feet (2.5% of the total hardwood inventory). During this time period, there was a net increase in forest volume inventory.
- There is an estimated 13.9 million tons of available biomass material annually, from unused logging residues, pre-merchantable timber, and cull (low-grade) timber.
- Approximately 4.6 million acres (20%) of the commercial forest are under an identified certification program or are managed by government entities that require sound forest management.

FORESTRY CASH RECEIPT REPORT METHODOLOGY

The following calculations were used in converting volume units reported from severance tax forms to the volumes shown in this report. This methodology is based on Forestry Cash Receipt Report, 1986, Dr. Bill McKee, Alabama Cooperative Extension Service.

I. Pine Sawtimber

- A. Pine Lumber Production (MBF Board Measure) * .88 = Lumber Production, MBF Scribner Log Rule.
- B. Pine Logs (MBF Doyle Rule) * 1.157 = Volume Pine Logs, MBF Scribner Log Rule.
- C. (A)+(B) = Total Pine Sawlog Harvest * Price per MBF Scribner Log Rule = Value of Pine Sawtimber in Scribner Log Rule.
- D. Conversion to cubic feet: 5.5 cubic feet per MBF, Scribner

II. Hardwood Sawtimber

- A. ((Hardwood Lumber Production in MBF Board Measure + (((Switch Tie Pieces*60 BF per Piece) + ((Cross Ties+MineTies+Mine Props)*45 BF per Piece))/1000))* .70 = Lumber Production, MBF Doyle.
- B. (A) + Hardwood Logs, MBF Doyle Log Rule = Total Hardwood Sawlog Harvest in Doyle Rule * Price per MBF Doyle Rule = Hardwood Sawtimber Value.
- C. Conversion to cubic feet: 3.6 cubic feet per MBF, Doyle

III. Pine Pulpwood

- A. Harvest in Cords * Price per Cord = Pine Pulpwood Value.
- B. Conversion to cubic feet: 85 cubic feet per cord

IV. Hardwood Pulpwood

- Harvest in Cords * Price per Cord = Hardwood Pulpwood Value.
- Conversion to cubic feet: 80 cubic feet per cord

V. Poles and Piling

- A. Pole Production in MBF Doyle + Piling Production in MBF Doyle * Weighted price of Poles and Pilings per MBF Doyle = Value of Poles and Piling.
- B. Conversion to cubic feet: 3.6 cubic feet per MBF, Doyle

VI. Turpentine

- Turpentine in 400 Pound Barrels * Price per Barrel = Turpentine Value
